SUMMARY

Frontend developer, passionate about technology, passion for technology, and already complete IT school and some relevant courses. Interested in creative web design with visually appealing and easily understood by wide audience. Excelled in HTML, CSS, and Javascript as well as latest technologies such as React, Tailwind, and Bootstrap. Currently looking opportunities in technology company where I could create meaningful projects and benefit others.

TECHNICAL SKILLS

- Languages   : HTML, CSS, Javascript, Typescipt.
- Technologies   : React, Tailwind, Bootsrap, React Oauth, Github, Figma.
- Other   : Problem Solving, Algorithms, UI/UX

PROJECTS

- **Alta Dashboard** : An application for schools or other educational institutions to manage tasks assigned by teachers or mentors, and to manage submissions from students. It also includes a discussion forum for students and teachers. In this project, I am using React with TypeScript, and for the components, I am using Daisy UI. Additionally, I am using Redux to facilitate global state management **Github**.

- **AirBnb** : This platform was created to facilitate customers who are looking for accommodations or homestays in specific areas. The platform also utilizes the Geocoding API to obtain latitude and longitude, which allows users to view the accommodation location in detail **Github**.

- **LapakUMKM** : LapakUMKM is a platform connects customers with locally-made products from various regions in Indonesia and supports business owners by providing a new sales channel to reach a wider audience. In this project, I am using React TypeScript and also using ReactOauth to provide a login option with Google. As for the components, we are trying to use the ones from Radix UI. **Github**.
